## YT-267-2A

### Two-Needle Lockstitch Free-arm Flatbed Industrial sewing machine For Medium-weight Applications

#### SPECIFICATION:

- The machine is specialist for the production of car seats, trendy upholstered furniture or safety-sensitive products made of technical textiles.
- The model YT-267-2A is the perfect sewing machine for production of upholstery, tarpaulins, automotive upholstery, boat covers, furniture upholstery, leather work and other heavy weight materials such as canvas, nylon, handbag, suitcase, sofa, glove, camping material, and webbing.
- The vertical hook, with increased bobbin capacity is especially suited for the manufacturing with solid sewing threads, the standard safety clutch helps to prevent hook damage or uncontrolled change of hook timing. Two models available: 267-1A & 267-2A (twin needle, gauge set from 6 to 10mm).
- All products are developed on the basis of the same platform and have similar modules. A low-cost stock of spare parts and easy maintenance are your advantages now and in the future.
